The Sebel Sydney Manly Beach

Accor Vacation Club CEO: Craig Wood

Accor Vacation Club General Manager / Hotel Operations - Australia: Phil Reid

Interior Designer: In Design International

Photographer: Damien Kook

Builder: McDas Projects

In Design International (IDI) was founded in the French Alps by director Penny Del Castillo. Having moved around the world, the studio has now landed in Melbourne, Australia. The award-winning team of interior architects and designers have an extensive portfolio of completed refurbishments for some of Australia's iconic hotels, including most recently Sebel Sydney Manly Beach, Adina North Bank, Sebel Flinders Lane, (Grand Mercure) Basildene Manor WA, Novotel Brisbane and many more. The studio is accustomed to creating bespoke spaces for exclusive wellness retreats and spas, including Novotel Nusa Dua, Grand Mercure Puka Park, One Wybelenna Brisbane, O'Reilly's Lost World – Rainforest Retreat, Batu Karang Resort & Spa and more. Private residential projects extend across bachelor living, beach houses to contemporary homes for both high profile executives and celebrities. In Design International's offering has spread to date only by word-of-mouth from repeat clientele who respect the studio's dynamic team of experienced talent, with principles across interior design, furniture design, fashion, graphics, hospitality, marketing, and business. To achieve the best finish for each client project, the team collaborate with the finest hardware suppliers, material providers, architects, engineers, and industry consultants.

'In the design industry we are exposed to new products and new technologies on almost a daily basis. Biowood was one that truly grabbed my attention from the first sample sighting. We had specified Biowood on a couple of occasions on smaller projects but making use of this incredibly versatile product across the entire Sebel hotel refurbishment was an outstanding choice for its simplicity of installation, cost effectiveness and environmentally sustainable values.

My team and I love the variety of profile and colour choices to combine with our schematics. The depth and texture of this product brings otherwise flat surfaces to life!

Kindest regards

PENNY DEL CASTILLO
