

bbi Birch FSC® Plywood

bbi Blondeline Birch FSC® Poplar Core is manufactured using a birch veneer, pressed onto a poplar core with an E0 Melamine glue. bbi Blondeline Birch FSC® Poplar Core is a popular and economical lining ply that has an attractive face, making it an aesthetically pleasing but low cost option for ceiling and wall linings, lining industrial buildings, and garages.

bbi FSC® B/BB 100% Birch Premium uses a high quality Birch veneer pressed onto a 100% Birch core with an E0 Phenolic glue. bbi FSC® B/BB 100% Birch Premium is a superior grade to poplar core making it suitable for ceiling and wall linings, joinery, and furniture.

For applications where a high end finish is required, bbi recommends the use of bbi FSC® B/BB 100% Birch Premium.

The pre-sanded faces take stain, polyurethane, oil, and paint well and save time on prep as there is no stopping or sanding required. bbi Birch FSC® is strong enough to hang shelving, tools, and bicycles and it takes knocks well.

bbi Birch FSC® is a non-structural product and untreated so is designed for interior use only.
