

bbi BendyPly Plywood

bbi BendyPly is manufactured using several veneers running in the same direction giving it a high amount of flexibility. The veneers can be laid either along the sheet or across the sheet depending on which way you want to curve

With its attractive yellow/brown face and subtle grain, BendyPly is perfect for any application where curves are required such as wall and ceiling linings, caravans, tiny homes, trailer interiors, shopfitting, furniture, and artworks

BendyPly is a non-structural product and untreated so is designed for interior use only.
