

HARDWOOD DECKING PROFILES

wood products **bbi**

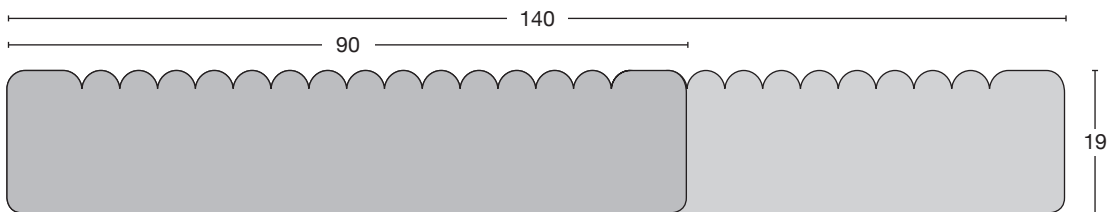

VITEX / PLAIN

VITEX / CROWN

KWILA / REEDED

Measurements are to scale 1:1

WHY USE bbi VITEX?

bbi Vitex is a hardwood from the Solomon Islands with a 'durable' classification. It has a golden to creamy grey appearance. Its durability makes **bbi** Vitex an excellent timber for use outdoors, including decking, boardwalks and landscaping.

Special care is taken to air dry the timber before it is run into decking. This results in a superior appearance with reduced movement and shrinkage once the decking is installed.

WHY USE bbi KWILA?

We only use third party verified legal decking. Our Kwila is kiln-dried.

VITEX

SIZE	FINISH
90x19	Plain
115x19	Plain
140x19	Plain
