

bbi LitePoplar FSC® Plywood

bbi LitePoplar FSC® is manufactured using a high-quality poplar veneer, pressed onto a poplar core with an E0 Melamine glue. With its mostly creamy-white appearance with pink tones and subtle grain LitePoplar FSC® is great for ceiling and wall linings, joinery, and shopfitting

The pre-sanded faces take stain, polyurethane, oil, and paint well and save time on prep as there is no stopping or sanding required. LitePoplar® FSC® is strong enough to hang shelving, tools, and bicycles and it takes knocks well.

LitePoplar® FSC® is a non-structural product and untreated so is designed for interior use only.

bbi LitePoplar® FSC® Plywood

Sheet Size	Thickness
2400 x 1200 mm	9, 12, 18 mm
