

bbi RedLine® FSC® Plywood

bbi RedLine® FSC® Poplar Core is manufactured using a hardwood veneer, pressed onto a poplar core with an E0 Melamine glue. bbi RedLine® FSC® Poplar Core is a popular and economical lining ply that has an attractive face, making it perfect for lining industrial buildings and garages.

bbi RedLine® FSC® Premium Solid Hardwood uses a hardwood veneer pressed onto a hardwood core with an E0 Phenolic glue. bbi RedLine® FSC® Premium Solid Hardwood is a superior grade to poplar core making it suitable for ceiling and wall linings, joinery, and furniture.

The pre-sanded faces take stain, polyurethane, oil, and paint well and save time on prep as there is no stopping or sanding required. bbi RedLine® FSC® is strong enough to hang shelving, tools, and bicycles and it takes knocks well.

bbi RedLine® FSC® is a non-structural product and untreated so is designed for interior use only.
